LinkedIn | GitHub | Portfolio

Professional Summary

Computer Science student with hands-on experience in Linux system administration, networking, cybersecurity, and SAP ABAP Cloud. Skilled in troubleshooting, security monitoring, log analysis, RAP, CDS Views, Open SQL, and OData V4, with practical project experience across system administration, SOC, and SAP environments.

Education

B.Tech – Computer Science and Engineering

Centurion University of Technology and Management, Odisha

Expected Graduation: 2027

CGPA: 9.23

Relevant Coursework

Data Structures & Algorithms, Operating Systems, Database Management Systems (DBMS), Computer Networks, Object-Oriented Programming (OOP), Compiler Design, Software Engineering

Technical Skills

System Administration: Linux (Ubuntu, Red Hat – Basic), Windows, Linux CLI, File System Management, File Permissions, User and Group Management, Access Control, Process Management, Service Management, System Troubleshooting

Networking & Security: TCP/IP, DNS, DHCP, VLAN, Network Security, Security Monitoring, Log Analysis, Incident Response, Vulnerability Assessment, SOC

Cybersecurity Tools: Nmap, Wireshark, Nessus, OpenVAS, Splunk, Metasploit, Wazuh, John the Ripper, GoPhish, Shell Scripting

SAP ABAP: ABAP Cloud, SAP RAP, CDS Views, Open SQL, DDIC, OData V4, SAP Fiori Elements, Behavior Definitions, Behavior Implementations

Programming: C, Python, Core Java, OOP, JavaScript, HTML, CSS

Development Tools: Git, GitHub, VS Code, IntelliJ IDEA, Eclipse / ADT

Projects

Cyberforge – Cybersecurity Learning Platform

GitHub

React, Node.js, Express.js, Firebase

- Developed a cybersecurity learning platform featuring courses, CTF challenges, leaderboard, progress tracking, and cybersecurity/security news with Hacker News integration.
- Integrated Gemini 2.5 Flash chatbot, browser-based Linux terminal using xterm.js and Tiny Core Linux, Firebase authentication/database/hosting, and activity analytics.

Travel Management System – SAP ABAP Cloud

GitHub

ABAP Cloud, RAP, CDS, Open SQL, OData V4

- Developed a Travel Management application using SAP RAP with CRUD operations and a CDS-based data model.
- Implemented behavior definitions and implementations and exposed the application through OData V4 and SAP Fiori Elements using service definition and service binding.

ZT-NET – Zero Trust Enterprise Network Simulator

GitHub

Cisco Packet Tracer, VLAN, Network Security

- Designed a segmented enterprise network using VLANs with inter-VLAN communication and access-control concepts.
- Simulated cybersecurity incident response scenarios and applied practical network security concepts.

Sentiment Analysis – AI/ML Internship Project

GitHub

Python, Machine Learning

- Developed a Python-based sentiment analysis solution using text preprocessing and machine learning techniques for sentiment classification and prediction.

Certifications

- SAP Certified – Back-End Developer – ABAP Cloud** | SAP | 2026 | [Link](#)
- Security Analyst Certificate Programme** | Reliance Foundation Skilling Academy | 2026
- Core Java Training** | LIT | 2025
- AI & ML Internship Certification** | Teachnook | 2024

Achievement

Solved 200+ Data Structures and Algorithms problems on GeeksforGeeks | [Certificate](#)
